

5/16/23

## Playtest Notes

### Things that the players liked:

- Slideshow showing what to do
  - Laughs at the cat
  - Different font color on slideshow is nice
  - Laughing with the racoon and trapping the cat
  - Enjoying the vent once it was figured out -Jacob
  - Cat roomba
  - Being the gremlin was fun
  - No communication issues on what buttons to press (Minus flower pots)
- 

### Things that the players didn't like:

- Ways to describe theres only 4 hats so far
  - More zoom its to far away to see anything (Split Screen)
  - Jacob didn't know what you were holding
  - We need something on the main menu to show what to press to get into slideshow
  - How do you unready (Explain to player)
  - Interaction buttons not showing up to explain bed
  - Players don't remember outlines sometimes
  - Mash which button?
  - Didn't know that he could interact with/what to do
  - Feels to fast - Cat
  - Aren't aware of the trash bag
  - Jacob didn't know that he could interact with the bed
  - Camera needs to come in more (Single screen)
  - Having trouble getting through the doors
  - How do we show the player how they can vomit hairballs? If it's being kept in
  - How do I get out of the litter box? - Chelsea
  - Couldn't figure out mud splatters
- 

### Feedback:

- Type of cooldown for the cats
- How do we figure out how players can remember what they need to interact with? Aka the outline colors
- Merge split screen like lego star wars (Can be nauseating)
- Change slide order to first (Highlights second screen)
- Gremlins can't touch needs to be unhighlighted (Split Screen)
- Arena like
- Cats can't pick up the pillows until the bed is made
- Slide showing the opposite
- Slide showing that players can directly interfere with each other

- Size up hairballs
  - Maybe with an X that shakes showing you can't use something for mud splatters
  - Be sure to communicate with your HouseKeeping buddies
  - Introducing a random hazard?? (Earthquake, etc)
  - Throw up on the Keeper
  - Cat scratches keeper and then gets away animation (Later on)
  - People didn't know were to put the racoon still
- 

Chip Feedback:

- If you shoot vomit then can smear the roomba through it
  - Wonder if there's a way to start with split screen then move to normal screen
  - Strategy for holding an area on its own
  - Translate the van into the driveway from road
- 

For later:

If someone is at the house and the gremlin freaks out and the Keepers respond

---

Our feedback:

- Van falls from the sky and the ramp deploys (Different every time)
- Maybe getting rid of hairballs
